

Upload your invoices. Get a clean Excel sheet. No typing.

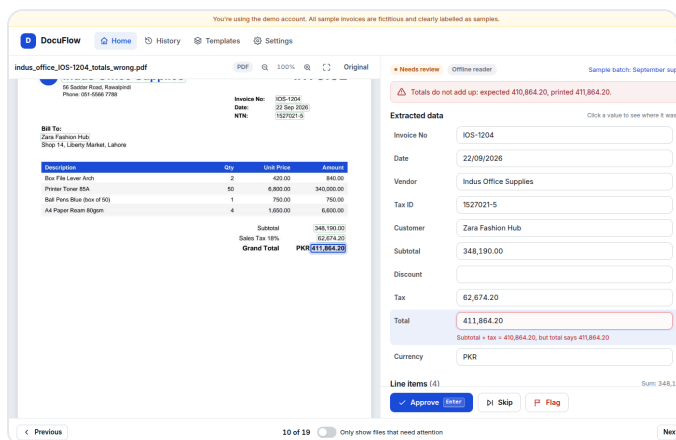

PDFs, scanned copies and phone photos of invoices, receipts and purchase orders become a checked spreadsheet in minutes.

THE PROBLEM

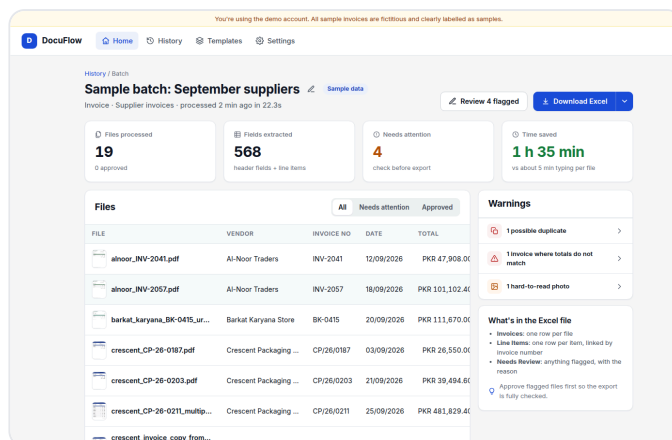

Accounts teams type hundreds of supplier bills into Excel every month, around 5 minutes each. Wrong totals and bills entered twice are found weeks later, if at all.

THE SOLUTION

- Drop in up to 100 files (or a ZIP) at once
- Every field and line item extracted
- Totals re-added, duplicates and blurry photos flagged
- Review only what's flagged, then download Excel in **your** columns

Review screen: the value is highlighted on the original; a wrong total is caught.

Batch summary with warnings and time saved.

MEASURED RESULTS (19-DOCUMENT TEST SET)

99.4%

fields correct on readable documents

1.4 s

per document (vs ~5 min by hand)

17/19

documents correct with zero edits

100%

wrong totals, duplicates & blurry photos flagged

Fictitious test documents incl. photos, a scan and an Urdu-English bill. We'll measure the same on 20 of your own invoices for free.

PRIVATE BY DEFAULT

Files are visible only to your team, deleted on your schedule (even right after download), and never used to train AI. Self-hosting available.

PLANS

Starter · Business · Enterprise. One-time setup plus a monthly plan. Low-cost pilot for your first month.

Free test on 20 of your invoices

Send them over. You get the Excel back within a day.
